

PRACTICAL ASSESSMENT OBSERVATION CHECKLIST

LEVEL 5-MODULE 2

UNIT: COMPUTER NETWORK

UNIT CODE: IT/CU/ICTA/CR/03/4/MA

Candidate Name: _____

Admission Number: _____

Assessor Name: _____

Date: _____

Duration: 3 Hours

Cutting List

No.	Item	Quantity	Provided By
1	Desktop/Laptop Computers	3	Institution
2	Network Switch	1	Institution
3	UTP Ethernet Cables	3	Institution
5	Network Printer	1	Institution

Practical Assessment Checklist (50 Marks)

Task 1: Set Up a Star Topology Network (15 Marks)

No.	Item to be Evaluated	Allocated Marks	Candidate Score	Remarks
1	Correctly identifies required networking devices and cables	2		
2	Connects all computers to a central switch forming a star topology	5		
3	Powers on and verifies operation of all devices	2		
4	Configures correct IP addresses on all computers	3		
5	Successfully tests connectivity using ping command	3		
Subtotal		15		

Task 2: Create and Share a Folder with Word and Excel Files (15 Marks)

No.	Item to be Evaluated	Allocated Marks	Candidate Score	Remarks
6	Creates a folder named Shared Resources	2		
7	Creates and saves a Word document in the shared folder	3		
8	Creates and saves an Excel workbook in the shared folder	3		
9	Configures folder sharing correctly	3		
10	Accesses shared folder from another workstation	2		
11	Opens both shared files successfully from another workstation	2		
Subtotal		15		

--	--	--	--	--

Task 3: Install Printer and Printer Drivers (10 Marks)

No.	Item to be Evaluated	Allocated Marks	Candidate Score	Remarks
12	Connects printer correctly to host computer	2		
13	Installs appropriate printer drivers	4		
14	Verifies successful printer installation	2		
15	Prints a successful test page	2		
Subtotal		10		

Task 4: Share Printer Over the Network (10 Marks)

No.	Item to be Evaluated	Allocated Marks	Candidate Score	Remarks
16	Enables printer sharing on host computer	2		
17	Assigns correct printer share name	2		
18	Connects another workstation to the shared printer	3		
19	Successfully prints through the shared network printer	3		
Subtotal		10		

Practical Assessment Total: _____ / 50 Marks

Product Checklist (10 Marks)

No.	Product to be Evaluated	Allocated Marks	Candidate Score	Remarks
1	Functional star topology network established and operational	2		
2	All computers can communicate successfully through the network	2		
3	Shared Resources folder created and shared successfully	2		
4	StudentList.docx available and accessible over the network	1		
5	MarksSheet.xlsx available and accessible over the network	1		
6	Printer installed and functioning correctly	1		
7	Shared printer accessible and operational from another workstation	1		
TOTAL		10		

E. Oral Assessment Checklist (30 Marks)

No.	Oral Question / Competency to be Assessed	Expected Answer	Allocated Marks	Candidate Score	Remarks
1	Explain the characteristics of a Star Topology.	All devices connect to a central device such as a switch or hub.	2		
2	State two advantages of using a Star Topology in a LAN.	Easy troubleshooting, easy expansion, failure of one node does not affect others. (Any 2)	2		
3	Explain the function of a switch in a network.	Connects devices within a LAN and forwards data using MAC addresses.	2		

4	Explain the role of a router in providing network connectivity.	Connects different networks and routes data packets between them.	2		
5	State the purpose of an IP address in a computer network.	Uniquely identifies a device on a network.	2		
6	Explain the purpose of a subnet mask.	Separates the network portion from the host portion of an IP address.	2		
7	Describe the steps used to test connectivity between computers using the ping command.	Open Command Prompt and use ping followed by the destination IP address.	2		
8	Explain what successful ping replies indicate.	Devices can communicate successfully over the network.	2		
9	Define file sharing and explain its importance in a network environment.	Making files accessible to other users over a network for collaboration and resource sharing.	2		
10	Explain the procedure for sharing a folder on a network.	Create folder, enable sharing, assign permissions and access it from other computers.	2		
11	State two permissions that can be assigned to a shared folder.	Read, Write, Modify, Full Control (Any 2).	2		
12	Explain the importance of printer drivers during printer installation.	Drivers allow the operating system to communicate with the printer.	2		
13	Describe how to verify that a printer has been installed successfully.	Check printer status and print a test page successfully.	2		
14	Explain the concept of printer sharing in a network.	Allows multiple users to access and use one printer over a network.	2		
15	Describe the steps followed to connect to a shared printer from another computer.	Search for the shared printer, connect to it, install drivers if required, and print a test page.	2		
Total 30 marks					

Decision Outcome

Outcome	Tick (✓)
Competent	☐
Not Competent	☐

Assessor Signature: _____

Candidate Signature: _____

Date: _____
