

THE ABERDARE TECHNICAL COLLEGE

PRACTICAL OBSERVATION CHECKLIST

PRACTICAL 1 TERM 2 MODULE 2

UNIT OF COMPETENCE: COMPUTER REPAIR AND MAINTENANCE

ISCED UNIT CODE: 0714 351 04A

ELEMENT: PERFORM TROUBLESHOOTING

DURATION: 2 HOURS

TOTAL MARKS: 100

CANDIDATE DETAILS

Name: _____

CDACC Reg No: _____

Level: _____

Date: _____

ASSESSOR DETAILS

Name: _____

Assessor No: _____

Signature: _____

Center: Aberdare Technical College

CUTTING LIST OF MATERIALS / RESOURCES

No	Item	Specification / Requirement	Provided By
1	Desktop computer system	Faulty system for troubleshooting	College
2	Monitor	VGA/HDMI display unit	College
3	Keyboard	Input device testing	College
4	Mouse	Input device testing	College
5	CPU casing	Access to internal components	College
6	Power Supply Unit (PSU)	Power diagnostics	College
7	RAM modules	Memory fault testing	College
8	Hard Disk / SSD	Storage troubleshooting	College
9	Power cables	Power connection testing	College
10	Data cables (SATA/VGA/HDMI)	Connectivity testing	College
11	Screwdrivers	Disassembly tools	College
12	Multimeter	Electrical testing	College
13	Anti-static wrist strap	Safety protection	College
14	Flashlight	Internal inspection	College

A. PRACTICAL OBSERVATION CHECKLIST (50 MARKS)

TASK 1: USER DATA ASSESSMENT (10 MARKS)

Criteria	Max Marks	Marks Awarded	Comments
User interview conducted correctly	3		
Problem identified correctly	2		
Symptoms and changes recorded	3		
Fault summarized clearly	2		

TOTAL = 10

TASK 2: COMPUTER PROBLEM IDENTIFICATION (10 MARKS)

Criteria	Max Marks	Marks Awarded	comments
External connections checked	3		

System indicators observed	3		
CPU opened safely	2		
Internal components inspected	2		

TOTAL = 10

TASK 3: ANALYSIS OF USER DATA (10 MARKS)

Criteria	Max Marks	Marks Awarded	comments
Complaint compared with findings	3		
Cause identified correctly	4		
Logical hypothesis developed	3		

TOTAL = 10

TASK 4: SOLUTION AND REPAIR (10 MARKS)

Criteria	Max	Marks	Comments
-----------------	------------	--------------	-----------------

	Marks	Awarded	
Corrective action applied	4		
System powered on for testing	2		
Boot and peripherals tested	4		

TOTAL = 10

TASK 5: DOCUMENTATION (10 MARKS)

Criteria	Max Marks	Marks Awarded	Comments
Fault identified clearly	2		
Cause stated correctly	2		
Steps documented properly	3		
Final status recorded	2		
Prevention recommendation given	1		

--	--	--	--

TOTAL = 10

B. PRODUCT CHECKLIST (20 MARKS)

Criteria	Max Marks	Marks Awarded	Comments
System boots successfully	5		
Display restored	3		
Keyboard/mouse functional	3		
System properly reassembled	4		
Fault report submitted	5		

TOTAL = 20

C. ORAL ASSESSMENT CHECKLIST (30 MARKS)

No	ORAL QUESTION	EXPECTED RESPONSE	MAX MARKS	MARKS AWARDED
1	Explain	Systematic process of	5	

	troubleshooting in computer repair	identifying and fixing faults in a computer system		
2	State causes of no display fault	Loose RAM, faulty cable, PSU failure, monitor issues	5	
3	Describe function of RAM in boot process	Temporarily stores data and instructions for active processing	5	
4	Explain function of PSU	Supplies and regulates electrical power to all components	5	
5	State troubleshooting steps	Identify problem, diagnose, repair, test, document	5	
6	Describe safety precautions in PC repair	Use anti-static strap, disconnect power, handle components carefully	5	

TOTAL = 30 MARKS

Assessment outcome

Competent >=50	Not competent <49
