1. Distinguish between **System Software** and **Application Software**, giving two examples of each. (6 marks)
2. Outline **four** common methods or techniques an IT technician can use to collect software user needs within an organization. (4 marks)
3. State **four** critical factors (excluding hardware compatibility) that an organization must consider before selecting or purchasing software. (4 marks)
4. Briefly explain **two** advantages and **two** disadvantages of purchasing **Off-the-Shelf** (commercial) software compared to developing Bespoke (custom) software. (4 marks)
5. Name **four** settings or parameters that can be modified when configuring or managing a local user account profile. (4 marks) Pcs.

1. System software provides a platform for other software to run while Application softwares are designed to perform specific tasks. 04
System softwares are like Operating system.
Application SW are like MS Word, Google Chrome.

2. Use of questionnaire ✓
Use of interviews ✓
Uses of Observation ✓ 03

3. Cost of SW ✓

Reliability of the SW ✓

Security with the SW ✓

Scalability and flexibility. ✓

QTX Avoid using abbreviations

Advantages
2. Off the shelf is readily available in market compared to bespoke.

- Off the shelf is cost effective to the user when buying compared to bespoke which has much costly to design.

Disadvantages
Off the shelf is much prone to insecurity compared to bespoke which is only designed for specific organization for certain tasks. Off-the-shelf has limited task performance compared to bespoke that offers the specific task performance.

5. Password ✓

Users name. ✓

Account expiry time ✓

Account Status whether Administrator, Standard or guest account.

c. Administrator Account

This is the main account with most privileges to all.

Standard account

This is a less privileged account used for day to day tasks.

Guest Account.

This is a temporary account with less or no privilege.

03

7. Storage of the Software.
Skill level of the accountant.
Budget to be met by organization.
Security of the Software.
Durability of the software.
How well the software meet user needs.
Future expansion capability.

Factors to
consider

Off-the-shelf and in-house methods can be used where off the shelf will be much suitable due to easy to use with even less skills, its also less complicated and time saving to install.

8. Senior IT Administrator; A. permanent Receptionist and Visiting Clients / Interns.

- (i) Senior IT Administrator manages the Administrator account. This will help manage all or most privileges. 06
Permanent Receptionist manages the Standard account since they perform day to day task using it.
Visiting clients / Interns manages the Guest account since they are just using the computer for a limited moment.

- b). - It can lead to data loss since a user will only keep the data they are in need of trashing any other data.
- It may lead to inaccessibility since one user may do some change configure the and make it inaccessible.
- It may cause data corruption. 03
