Operating System (Windows 10 or later)	1	candidate
BIOS/UEFI enabled system	1	Institution

Task 1: Managing Local User Accounts (20 Marks)

(a) Create Local User Accounts

Create the following local user accounts:

Account Name	Account Type
Student1	Standard User

Admin1	Administrator
Guest1	Guest or Limited User

(b) Configure User Accounts

Perform the following:

1. Change the password for Student1.
2. Verify that Admin1 has administrator privileges.
3. Rename Guest1 to Visitor1.
4. Restrict Student1 from installing software.

(c) Explain User Accounts

Briefly explain the purpose of:

- Standard User Account
- Administrator Account
- Guest Account

Task 2: Performing Data Backup

(a) Create Backup Data

1. Create a folder named **Backup_Practical** on the desktop.
2. Create three sample documents.
3. Copy the documents into the backup folder.

(b) Verify Backup

Show that all files have been successfully backed up in the folder.

(c) Importance of Backup

State three reasons why data or software backup is important.

Task 3: Windows Installation and Configuration

(a) Create Bootable Installation Media

Using the **Media Creation Tool**, create a bootable Windows installation USB drive:

1. Download and run the Media Creation Tool from Microsoft, use the link below.

<https://www.microsoft.com/software-download/windows10>

2. Accept the license terms.
3. Select **Create installation media (USB flash drive)**.
4. Choose the correct language, edition, and architecture.
5. Select USB flash drive as the destination.
6. Complete the creation process.

(b) Install Windows Operating System

Using the bootable USB drive:

1. Configure the computer to boot from USB.
2. Start the Windows installation process.
3. Select installation preferences.
4. Choose or create a partition for installation.
5. Complete the installation.

(c) Configure the Operating System

After installation:

1. Set the computer name.
2. Configure date and time settings.
3. Create a local administrator account.

End of Practical Assessment
